Foreword

The 1980 Edition of the North Carolina Pesticide Report represents a revision of previous issues. By elaborating on the purpose of this report, by adding new material, and by better defining the substances listed, we attempted to reflect in a more meaningful manner the information collected during the 1980 calendar year. We hope that more readers will be able to use it more effectively and be able to understand how its use can facilitate the pesticide industry from manufacturer to consumer.

This will also acknowledge and express our appreciation to the following people who made significant contributions to the contents and preparation of this Pesticide Report: *Pesticide and Plant Protection Division* - Brenda L. How to Use This Report

Considerable time and effort has gone into editing and organizing this 1980 edition of the Pesticide Report. Every section has been updated, new information added as necessary and details expanded to make this Report a more complete and up-to-date reference as to the sale and use of pesticides in North Carolina.

In this Pesticide Report you will find:

Introduction

The Introduction accurately reflects the development of laws and regulations governing the sale and use of pesticides in North Carolina.

It also refers to certain divisions in the North Carolina Department of Agriculture that perform key roles in regulating and controlling the sale and use of pesticides in this State.

Samples at Variance From Guarantee, 1980

This table lists the samples found by the Department's laboratories to be at variance from guarantee in 1980. The table also lists the name of each manufacturer, each pesticide brand name, and presents data and a description indicating how each sample examined varied from guarantee.

Other Violations, 1980

This section gives the names of firms that manufactured or distributed products in North Carolina and had one or more violations under the North Carolina Pesticide Law of 1971. These violations constituted either unregistered or misbranded products examined at pesticide outlets but not sampled for analysis.

Summary of Regulatory Activities Performed Under the North Carolina Pesticide Law, 1980

This section presents a summary of the total numbers of manufacturers who registered pesticides in North Carolina; pesticide formulations registered; pesticides examined; stop-sale, stop-use, or removal orders issued; licenses issued; and equipment inspections.

Introduction

Pesticides cover a large number of materials and mixtures intended for destroying, controlling, or repelling pests such as insects, weeds, and other noxious plants, predatory animals and birds, soil-infesting pests such as nematodes, algae, snails, and bacteria. Other examples are disinfectants, antiseptics and fungicides for use other than on living man or other animals, defoliants, various repellents, fly paper and other adhesive products whose action goes beyond simple mechanics, moth proofers, wood preservatives other than common paints, mildew controls, and seed fumigants.

An adequate and readily available supply of many of these products is essential in the economical production of feed and fiber crops. The preservation of many products in storage and the control of domestic and industrial pests which affect both the health and welfare of human beings and animals are likewise dependent on such materials.

While the development and distribution of various pesticides to serve the needs are important, provisions must be present to protect the public. During the years 1947 through 1971, it was the purpose of the economic poisons law (North Carolina Insecticide, Fungicide, and Rodenticide Act of 1947, G.S. 4A, Chapter 106) to protect the public from adulterated, misbranded, worthless, and dangerous products, and legitimate manufacturers from unscrupulous competition.

During the years 1953 through 1971, the aerial application of pesticides was regulated by the North Carolina Aerial Crop Dusting Law, G.S. 4B, Chapter 106. The Law and the regulations promulgated thereunder, in summary, required the registration and licensing of contractors and aviators who engaged in the custom application of pesticides by aircraft in North Carolina. The validity of a license was further restricted to the period of time that coverage by liability bond or insurance for damage by aircraft was in force.

During 1969, the North Carolina General Assembly through House Resolution 1392 directed the Legislative Research Commission to study the laws regulating pesticides in N. C. and report its findings and recommendations to the 1971 General Assembly. As a result of the findings and recommendations of the Commission, the North Carolina Pesticide Law of 1971 was adopted.

The N. C. Pesticide Law of 1971 established the North Carolina Pesticide Board as the governing body for the programs of pesticide management and control set forth in the Law. Provisions for regulating the use, application (aerial and ground), sale, storage, disposal and registration of pesticides are set forth in the Law.

The Law provides for the adoption of a list of restricted-use pesticides and requires the licensing of all pesticide dealers who sell restricted-use pesticides directly to users. Pesticide applicators and consultants are also subject to licensing requirements.

The Commissioner of Agriculture is responsible for administering and enforcing the Law and all rules and regulations adopted by the Board.

Each brand or grade of pesticide must be registered with the North Carolina Department of Agriculture before it can be legally offered for sale in the State. A $25.00 registration fee for each brand or grade must accompany each Application for Registration.

As under the economic poison law, a state-wide inspection service will be maintained for the collection of official samples of pesticides from dealers. Individual requests for inspections are also made. As authorized, additional pesticide samples will be taken at the user level as they are being applied to determine if they are being used in an approved manner. Samples of the commodity to which pesticides have been applied will also be taken when deemed appropriate.

Samples are sent to the Department's laboratories for analysis. Reports of analytical results are forwarded to manufacturers, dealers, and users. As a further means of reporting, the Pesticide Report covering a year's work as exemplified herewith, is published annually.

Brief of the North Carolina Pesticide Law of 1971

Governing Body

North Carolina Pesticide Board

Administrative and Enforcement Authority

Commissioner of Agriculture, Raleigh, N. C.

Assists the Board and Commissioner in an advisory capacity

North Carolina Pesticide Advisory Committee

Restricted-Use Pesticides

Any pesticide may be designated as a "restricted-use pesticide" upon the grounds that in the judgment of the Board it is so hazardous or injurious to persons, pollinating insects, animals, crops, wildlife, lands, or the environment that additional restrictions on its sale, purpose, use, or possession are required. Restricted-Use Pesticides include any pesticide required by the Environmental Protection Agency to bear the designation on its labeling "Restricted-Use Pesticide." (Restricted-Use Pesticides have been established by regulation.)

Pesticide Dealer Licensing Requirement

All pesticide dealers who sell restricted-use pesticides must be licensed. Application for a pesticide dealer's license must be accompanied by a fee of $25. All licenses shall expire on December 31 of the year for which they are issued. The license may be renewed annually upon application to the Department of Agriculture, accompanied by a fee of $25 for each license, on or before the first day of January of the calendar year for which the license is issued. Each applicant must demonstrate upon written, or written and oral, examination his knowledge of pesticides, their usefulness and their hazards; his competence as a pesticide dealer; and his knowledge of the laws and regulations governing the use and sale of pesticides.

Pesticide Applicator Licensing Requirement

No person shall engage in the business of pesticide application within North Carolina unless he is licensed annually by the Board. Each license application shall be accompanied by a fee of $25 for each applicator's license and an additional $10 for each aircraft to be licensed. A pesticide applicator is defined as any person who owns or manages a pesticide application business which is engaged in the business of applying pesticides upon the lands or properties of another; any public operator; any private golf course operator; any seed treater; any person engaged in demonstration or research pest control; and any other person who acts as a pesticide applicator and is not exempt from this definition. It does not include:

a. Any person who uses or supervises the use of a pesticide (i) only for the purpose of producing an agricultural commodity on property owned or rented by him or his employer, or (ii) only (if applied without compensation other than trading of personal services between producers of agricultural commodities) on the property of another person, or (iii) only for the purposes set forth in (i) and (ii) above.

b. Any person regulated by the North Carolina Structural Pest Control Law (G.S. Chapter 106, Article 4C.)

Each applicant must demonstrate upon written, or written and oral, examination his competence as a pesticide applicator or public operator.

Pest Control Consultant Licensing Requirement

No person shall perform services as a pest control consultant without first procuring from the Board a license. The application for a license shall be accompanied by an annual fee of $25. A pest control consultant is defined as any person who, for a fee, offers or supplies technical advice, supervision, or aid, or recommends the use of specific pesticides for the purpose of controlling insects, plant diseases, weeds, and other pests, but does not include any person regulated by the North Carolina Structural Pest Control Act. Each applicant must demonstrate upon written, or written and oral, examination his competence as a pesticide consultant. However, the North Carolina Pesticide Board may waive the requirement for taking parts of the North Carolina consultant examination provided the applicant has a Ph.D., master's, or bachelor's degree in the discipline pertinent to the category for which a license is desired and provided the applicant has demonstrated successful completion of pertinent academic training or has passed a written or oral examination offered by another state or a professional organization. Applicants will be required to successfully complete written, or written and oral, examination(s) which demonstrates adequate knowledge of pertinent subject matter not specifically completed in academic training including knowledge of applicator state and federal pesticide laws and related subject matter.

Handling, Storage, and Disposal of Pesticides

No person shall handle, transport, store, display, or distribute pesticides in such a manner as to endanger man or his environment.

Registration

Every pesticide prior to being distributed, sold, or offered for sale within this State or delivered for transportation or transported in intrastate commerce or between points within this State through any point outside this State shall be registered and such registration shall be renewed annually.

Registration Fee and Delinquent Penalty

A registration fee of $25 for each brand or grade of pesticide is required. An additional $25 delinquent registration penalty shall be assessed against the registrant for each brand or grade of pesticide marketed in North Carolina prior to registration.

Refusal or Cancellation of Registration

Registration is subject to refusal or cancellation for cause and upon hearing.

Deficiencies

A deficiency penalty of three times the percentage deficiency times the retail value of any product sold subsequent to sampling and prior to repossession, but not less than $25 shall be assessed against any registrant of a pesticide found deficient in active ingredients.

"Stop Sale, Stop Use Orders"

Any brand or grade found to be deficient or excessive in active ingredients, misbranded, adulterated, or not registered is subject to "Stop Sale, Stop Use Orders."

Penalties

Any person who shall be adjudged to have violated any provision of the Law, or any regulation of the Board adopted pursuant to this Law, shall be guilty of a misdemeanor and for each violation shall be liable for a penalty of not less than $100 or more than $1,000 or shall be imprisoned for not more than 60 days, or both. In addition, if any person continues to violate or further violates any provision of this Article after written notice from the Board, the court may determine that each day during which the violation continued or is repeated constitutes a separate violation subject to the foregoing penalties.

NOTE: Copies of the North Carolina Pesticide Law of 1971 and additional copies of the regulations adopted by the North Carolina Pesticide Board may be obtained upon request to the Pesticide and Plant Protection Division, North Carolina Department of Agriculture, P.O. Box 27647, Raleigh, North Carolina 27611.

.0307 REVIEW OF APPLICATION FOR COMPLETENESS 292
When application forms for registration of pesticides are 294
received by the pesticide and plant protection division, the 295
following procedure is initiated:
(1) The application forms are stamped with the date of 296
receipt. 297
(2) The application forms are examined to assure that all 299
copies are properly filled out. Minor errors or deletions 301
are corrected by office action.
(3) Registration fees submitted are verified for correctness 302
by matching the number of pesticide products listed on the 304
applications with the monies received.
(4) Pesticide products listed on the applications are examined 305
to verify that the required labels or labeling were 306
submitted. 307
(5) Pesticide products listed on the applications are examined 308
along with respective labels or labeling to determine 309
whether additional information or data will be required. 310
(6) Registration records are checked to determine if the 311
registrant has any outstanding "stop sale," "stop use," or 313
"removal" orders issued against any of the pesticide
products listed on the applications or any other pesticide 314
product not listed on the applications which bear the 315
registrant's name and address and/or is not registered in 316

(a) If an outstanding "stop sale," "stop use," or "removal" 317
order is found on record, the application for 318
registration is placed on "hold." 319

have been cleared, processing the application is 321
completed in accordance with the North Carolina 322

SECTION .0400 - SAMPLES AND SUBMISSIONS 475

.0401 SAMPLES; SUBMISSIONS 477

(a) Personnel of the pesticide and plant protection division 479
are authorized and directed to sample, test, inspect, and make 480
analysis of pesticides sold, offered for sale, distributed, or 481
being applied within this state, at the time and place and to 482
such an extent as is deemed necessary to determine whether such 483
pesticides are in compliance with the provisions of the North 484
Carolina Pesticide Law of 1971.

(b) An official analysis is made from the official sample. An 485
official check sample is kept until an analysis has been made of 486
the official sample. If the official sample analysis does not 487
pass analysis, an official check sample is retained for 90 days 488
in order to allow the registrant to obtain a portion of it for 489
his own analysis, if he so chooses. Requests for portions should 490
be made in writing to the Pesticide and Plant Protection 491
Division, North Carolina Department of Agriculture, Raleigh, 492
North Carolina, 27611.

History Note: Statutory Authority G.S. 143-446; 495
Eff. February 1, 1976; 496
Amended Eff. January 27, 1978. 497

.0402 TOLERANCES 499

In regards to establishing tolerances providing for reasonable 501
deviations from the guaranteed analysis statement, the following 502
guidelines are adopted: 503

(1) that, in general, a "passed" judgment on a pesticide 504
formulation be made if the analytical results are within 505
the following guidelines: 506

Pesticide Active Ingredient Guarantee, Percent	Allowable Deviation Below Guarantee	
1.00	15% of Guarantee	512
1.00 - 19.99	0.1 plus 5% of Guarantee	513
20.00 - 49.99	0.5 plus 3% of Guarantee	514
50.00 -100.00	1.0 plus 2% of Guarantee	515

Additional considerations: 517

(a) If a sufficient number of samples as determined by the 520
pesticide and plant protection division of a given
product indicate that the manufacturer is not 521
formulating the product to achieve the level of the 522
guarantee, an administrative judgment may be made to 523

warn the formulator against the practice of formulating 524
products in a manner only to stay within the allowable 525
deviation from the guarantee.

(b) A sample result falling outside of the guidelines may 527
not necessarily be "deficient" if one of the following 528
factors could reasonably be expected to have 529
contributed significantly to the off-limits analysis:

(i) special sampling problems, such as fertilizer- 532
pesticide mixtures and certain granular products; 533

(ii) accuracy, specificity, reproducibility, etc., of 535
the methods used when applied to the particular 536
formulation;

(2) that, allowable deviations, similar to those for 538
"deficiencies," are not applicable to "overages." Each 539
sample analysis will be judged individually as to whether 540
or not the overage is excessive by using the following 541
criteria:

(a) no illegal residues resulting from use according to 542
directions; 543

(b) no significant additional hazard to applicator or user; 544

(c) no significant damage to non-target organisms or the 546
environment; 547

(d) stability of ingredients and the need for "over- 549
formulating";

(e) accuracy, specificity, reproducibility, etc., of the 550
methods used when applied to the particular 551
formulation.

History Note: Statutory Authority G.S. 143-446; 554
Eff. February 1, 1976; 555
Amended Eff. January 27, 1978. 556

.0403 PESTICIDE SAMPLING PROCEDURES 558

(a) Procedures for sampling pesticides vary in accordance with 561
the type of pesticide to be sampled and the type of sample to be 562
taken.

(b) Pesticide samples are classified according to the 563
following categories and procedures: 564

(1) "Formulation samples" must be taken from the 565
manufacturer's original unopened container using clean 566
sampling equipment so as to avoid any contamination. 567
Judgments are based on tolerances for reasonable 568
deviations from the guaranteed analysis statement.

(2) "Pesticide use samples" are obtained by division 569
personnel who may sample pesticides from the consumer 570
as it is being applied or during preparation for 571
application. Judgments are made depending on the 572

directions for use contained on the registered 573
pesticide label.
(3) "Pesticide commodity samples" are obtained by division 574
personnel who are authorized to sample commodities and 576
submit them for analysis in order to determine whether
properly registered pesticides have been applied 577
according to label directions. 578
(4) "Pesticide incident samples" are obtained by division 579
personnel who are authorized to take samples, inspect, 580
and investigate any incidents in which pesticides are 581
reported or thought to be involved. 582

SECTION .0600 - PESTICIDE AND PESTICIDE CONTAINER DISPOSAL 1203 1204

.0601 DEFINITIONS 1206

The following definitions will be in effect throughout 2 NCAC 1209
10D .0600:

(1) "Complete destruction" of pesticides means alteration by 1210
physical or chemical processes to inorganic forms. 1211

(2) "Container" means any package, can, bottle, bag, barrel, 1212
drum, tank, or other containing device (excluding spray 1213
applicator tanks) used to enclose a pesticide or 1214
pesticide-related wastes. 1215

(3) "Excess pesticides" means all pesticides which cannot be 1216
legally sold or which are to be discarded. 1217

(4) "Inorganic pesticides" means noncarbon-containing 1218
substances used as pesticides. 1219

(5) "Heavy metals" means metallic elements of higher atomic 1220
weights, including but not limited to arsenic, cadmium, 1221
copper, lead, mercury, manganese, zinc, chromium, tin, 1222
thallium, and selenium. 1223

(6) "Metallo-organic pesticides" means a class of organic 1224
pesticides containing one or more metal or metalloid atoms 1225
in the structure. 1226

(7) "Organic pesticides" means carbon-containing substances 1227
used as pesticides, excluding metallo-organic compounds. 1228

(8) "Pesticide incinerator" means any installation capable of 1229
the controlled combustion of pesticides, at a temperature 1230
of 1000 degrees Centigrade (1832 degrees Fahrenheit) for 1231
two seconds dwell time in the combustion zone, or lower 1232
temperatures and related dwell times that will assure 1233
complete conversion of the specific pesticide to inorganic 1234
gases and solid ash residues.

(9) "Pesticide-related wastes" means all pesticide-containing 1236
wastes or by-products which are produced in the 1237
manufacturing or processing of a pesticide and which are 1238
to be discarded, but which, pursuant to acceptable 1239
pesticide manufacturing or processing operations, are not 1240
ordinarily a part of or contained within an industrial 1241
waste stream discharged into a sewer or the waters of the 1242
state.

(10) "Safe disposal" means discarding pesticides or containers 1244
in a permanent manner so as to comply with these 1245
procedures and so as to avoid unreasonable adverse effects 1246
on the environment. 1247

(11) "Sanitary landfill" means an approved disposal facility 1249
employing an engineered method of disposing of solid 1250

wastes on land in a manner which minimizes environmental 1251
hazards by spreading the solid wastes in thin layers, 1252
compacting the solid wastes to the smallest practical 1253
volume and applying cover material at the end of each 1254
working day.
(12) "Specially designated landfill" means a landfill at which 1256
complete protection is provided for the quality of surface 1257
and subsurface waters from pesticides, pesticide 1258
containers and pesticide-related wastes deposited therein, 1259
and against hazard to public health and the environment. 1260
Such sites should be located and engineered to avoid 1261
direct hydraulic continuity with surface and subsurface 1262
waters, and any leachate or subsurface flow into the 1263
disposal area should be contained within the site unless 1264
treatment is provided. Monitoring wells should be
established and a sampling and analysis program conducted. 1265
The location of the disposal site should be permanently 1266
recorded in the appropriate office of legal jurisdiction. 1267

History Note: Statutory Authority G.S. 143-441; 1270
Eff. February 1, 1976. 1271

.0602 DISPOSAL OF PESTICIDES 1273
(a) In considering disposal techniques, first preference shall 1275
be given to procedures designed to recover some useful value from 1276
excess pesticides and containers. Where large quantities are 1277
involved, the excess material should be used for the purpose 1278
originally intended, provided this use is legal. 1279
(b) Organic pesticides which do not contain mercury, lead, 1280
cadmium, or arsenic may be disposed of by incineration at 1281
temperatures which will ensure complete destruction. 1282
(c) Incineration is not applicable to those pesticides which 1283
contain heavy metals such as mercury, lead, cadmium, or arsenic, 1284
nor is it applicable to those organic pesticides or other 1285
metallo-organic pesticides which have not been treated to remove 1287
the heavy metals.
(d) If incineration is not applicable or available, disposal 1288
in specially designated landfills is an alternative. 1289
(e) All disposals of excess pesticides and pesticide-related 1290
wastes shall be instituted under approval and supervision of a 1291
pesticide disposal committee of the North Carolina Pesticide 1292
Board. This committee shall receive application for the desired 1293
disposal task, review each problem based on its individual 1294
circumstances and complexity, and submit a recommended solution 1295
plan to the disposal applicant. 1296

.1002 GENERAL REQUIREMENTS

(a) All agricultural aircraft operations in North Carolina shall comply with the Federal Occupational Safety and Health Act of 1971 (OSHA), the North Carolina Occupational Safety and Health Law, and regulations established thereunder. All agricultural aircraft operations shall comply with those parts of F.A.R.-137 not covered in this Regulation. In any case of conflict, a regulation of the aforenamed authorities takes precedence over any of this article.

(b) Each aerial application business shall have a licensed contractor. The contractor shall be responsible for the compliance of the business with all pesticide regulations except where responsibility is specifically designated to another person(s) by these Regulations.

(c) All agricultural aircraft operations shall keep a record of all custom applications showing the following:

(1) name of contractor;

(2) name and address of the person for whom the pesticide was applied;

(3) identification of farm or land sites treated with pesticide(s);

(4) name of crop which was treated;

(5) total number of acres treated;

(6) the year, month, day, and approximate time the pesticide was applied;

(7) the brand name of the pesticide(s) and EPA registration number;

(8) amount of formulated product or active material applied per acre (must specify);

(9) total gallons or pounds per acre of the final tank mix applied per acre;

(10) name of pilot;

(1) the boundaries and exact location of the target area(s),

(2) the identity of nontarget areas and safety hazards located on or adjacent to the target areas.

(e) Spray and spreading equipment shall be thoroughly rinsed after each agricultural aircraft operation except when the next agricultural aircraft operation will be made using the same pesticide, or if another pesticide, one which by its manufacturer's recommendations is compatible with that previously in the equipment, and will not result in any adverse effects or illegal residues. Rinsing shall be conducted in an area where an environmental hazard will not be created by the drainage or disposal of waste materials and conducted with methods which will not create an environmental or human hazard.

(f) During application, the flow and mixture of the pesticide(s) shall be uniform. Pilots and contractors shall utilize equipment which will maintain a uniform mixture and flow during application.

(g) Pilots and contractors shall use and operate, in any agricultural aircraft operation, aircraft equipped with spray or spreading equipment suited, according to its manufacturer's recommendations for the pesticide(s) to be applied. All aerial spray or spreading equipment shall be free of leaks and shall have a positive shutoff system to prevent leaking and dissemination of pesticides on any nontarget areas over which the flight is made. Such equipment shall not allow spillage, dripping and backflow or create a hazard from vapors or drift.

(h) No pesticide required to carry a warning on its label indicating toxicity to bees shall be applied by aircraft unless the owner(s) or operator(s) of any registered apiary located within one-half of one mile of the target area is notified not less than 24 hours nor more than 10 days prior to the beginning of a single application or a seasonal spray schedule and given the approximate time of day of application and type of pesticide to be used. Notification may be either oral or written. Notification for the purposes of this subcategory is defined as follows:

aerial contractors licensed in North Carolina and the revisions
will be effective on the fifth day of the first month in the 2166
quarter. It shall be the responsibility of the aerial 2167
contractors to obtain the revised apiary registrations for each 2168
quarter.

(i) The loading area shall be kept reasonably free of 2169
pesticide contamination. 2170

(j) No pesticide(s) shall be applied by an aerial applicator 2171
while any persons other than those assisting in the application 2173
are in the target area.

(k) The shape of the tank or hopper of the spray or spreading 2174
equipment shall be such as to allow complete drainage during 2175
flight and on ground. 2176

(l) The contractor or pilot shall report to the board any 2177
emergency or accidental release of pesticides from the 2178
application or auxiliary equipment if the pesticide poses a 2179
hazard or immediate danger to man, animals, or aquatic life, or 2180
threat of substantial injury to property. Such a report shall be 2182

To control drift, it shall be required that all aerial 2200
applicators of liquid pesticide formulations include and utilize 2201
in their schedules and procedures the following methods: 2202

(1) Fixed nozzles shall be spaced on the boom to afford a 2203
uniform spray pattern at the height the aircraft will be 2205
flown.

(2) No person shall apply a pesticide aerially under such 2206
conditions that drift from the application will cause 2207
adverse effect. 2208

(3) All pesticides applied aerially shall be released within 2209
10 feet above the target, except where obstructions in or 2211
adjacent to the target would endanger the safety of the
pilot while applying pesticides at that altitude. This 2212

restriction shall not apply to ultra-low volume (ULV) 2213
applications.
(4) All applications of the following liquid pesticide 2214
formulations shall be made using a D4 or larger disk with 2215
a 46 whirlplate with the discharge directed with the 2216
airstream or not more than 10 degrees below the 2217
horizontal, and operated at a maximum pressure of 40 2218
pounds per square inch, or a system producing a droplet 2219
size range not smaller than the above system, except for 2220
rotary-wing aircraft flying at speeds of 60 mph or less, 2221
in which case the nozzles may be directed downward:
(a) phenoxy herbicides, 2223
(b) paraquat, 2224
(c) picloran (tordon). 2225
(5) All applications of restricted-use pesticides other than 2227
those specified in (4) of this Rule shall be made using 2228
one of the procedures below: 2229
(a) use a D4 or larger disk with a 45 whirlplate with the 2230
discharge directed with the airstream or not more than 2231
10 degrees below the horizontal, and operated at a 2232
maximum pressure of 40 pounds per square inch, or a 2233
system producing a droplet size range not smaller than 2234
the above system, except for rotary-wing aircraft 2235
flying at speeds of 60 mph or less, in which case the 2236
nozzles may be directed downward; or
(b) use a boom with outside nozzles placed no closer to the 2237
wingtips than 12-1/2 percent of the total wingspan 2238
distance. If the length of the boom of the spraying 2239
equipment exceeds the nozzle span, a bleeder line shall 2240
be provided from the end of the boom to the last nozzle 2241
on the boom.

person shall wash or be washed immediately, thoroughly with soap 2264
and water and clothing replaced with clean clothing. Soap and 2265

Official Analyses of Pesticides 1980

Definitions of Decisions

A summary of pesticides analyzed and the results of samples determined to be at variance from the guarantee are tabulated in the following pages. For the reader's ready interpretation of the report, those designations used are explained in the following paragraphs.

"PASSED" signifies that the labeling and composition of the product satisfactorily complied with guarantees and requirements.

"DEFICIENT" signifies that one or more ingredients fell significantly below the guarantee. Such products are placed under "Stop Sale Orders" and are removed from the market for reprocessing or relabeling. A deficiency penalty is also assessed against the manufacturer.

"EXCESSIVE ACTIVE INGREDIENT" indicates a significant excess of one or more active ingredients. Such formulations could be harmful to the user and/or result in excessive residues.

"ADULTERATED" indicates that quantities of undeclared active ingredients were present above established tolerances. Such lots, batches or brands are stopped from sale and other appropriate action taken.

"MISBRANDED" signifies that labeling failed to conform to requirements. Omission of some item or statement is a more common flaw. Among these may be proper ingredient listing, skull and crossbones, "Poison" in red and antidote where these are required; net contents by weight or volume; class of, and unsulfonated residues of petroleum oils; and percentages of alkaloids instead of crude product such as sabadilla seed.

In some instances of misbranding, the defect appeared to be inadvertent and of a minor nature. In others, removal from sale is necessary.

"NOT REGISTERED" signifies that the product was not registered at the time it was sampled. Any such product is required to be registered prior to release from "Stop Sale Order." A delinquent registration penalty is also assessed against the manufacturer.

As has been the practice in past work, analyses were made largely for those ingredients which were considered of major importance, as, for example, methyl parathion, whereas the related compounds were not checked. For sake of brevity, active ingredients not checked are not listed in Table II. This should not be taken to indicate that manufacturers did not include them on labels. This procedure has been followed because it enables a broader coverage of all products offered for sale.
